SHOREMASTER DOCK BOXES

ShoreMaster's dock boxes are designed with rugged use of commercial marinas in mind

ShoreMaster's dock boxes are designed with rugged use of commercial marinas in mind.

Molded of rugged, UV stabilized polyethylene, the ShoreMaster dock boxes are easy to clean and corrosion resistant. Dock box hardware is stainless steel, to prevent theft, the dock box has a latch designed to accept a padlock.

ShoreMaster dock boxes are available in three sizes:

- Triangle 3' Corner
- Triangle 4' Corner
- Rectangle 7'6" x 3' x 2'

The triangular box saves valuable dockside space by fitting on the corner piece between the walkway and dock finger. If your Marina does not have built in corners, ShoreMaster makes an attachment bracket to place the dock box over the water and out of the walkway.

The rectangular dock box is large enough to store skis, fishing poles, or just about anything you would like to keep at dockside. A ShoreMaster attachment bracket can also place this large box over the water and out of the walkway.
