

Cantilever Lift

With the Cantilever Lift, you've got a hefty advantage.

ShoreMaster's cantilever lifts are ideal for most glacial lake areas in the United State and Canada. These lifts perform well in nonfluctuating water, depths of water over 2.5 ft, and calmer (lower wake) water. Their simple, trouble-free design (one cable and three pulleys) provides years of maintenance-free boat moorage. Visit us at www.shoremaster.com for more information.
